Resident Evil 5 PC Save Game Unlocker With Microsoft Games For W.5093942.TPB.87I.1. Field of the Invention This invention relates to an air conditioning system for an automotive vehicle and, more particularly, to an air conditioning system for an automotive vehicle comprising a centrifugal compressor for feeding a compressed refrigerant to a heat exchanger, which in turn provides air conditioning for a vehicle compartment, a fan motor driven by the compressed refrigerant to blow out the air in the vehicle compartment, and a warm-up fan motor driven by the compressed refrigerant to blow out the air from the vehicle compartment into the outside of the vehicle body. 2. Description of the Related Art Conventionally, in an air conditioning system of this type, the output of the fan motor for blowing out the air into the vehicle compartment (hereinafter referred to as "warm-up fan motor") is controlled in accordance with the amount of air blown out by the warm-up fan motor. More specifically, the speed of the warm-up fan motor is maintained at zero speed in the steady state when the amount of air blown out by the warm-up fan motor in a running state is approximately zero, and is gradually raised in proportion to an increase in the amount of air blown out by the warm-up fan motor from this steady state. The warm-up fan motor is constructed to rotate in a clockwise direction in the steady state. The starting rotation speed of this warm-up fan
